

To make your
workflow excellent.

“As a leading global partner in healthcare and research, our solutions are driving progress in preanalytics and life sciences to improve the quality of patient care and set standards in science.”

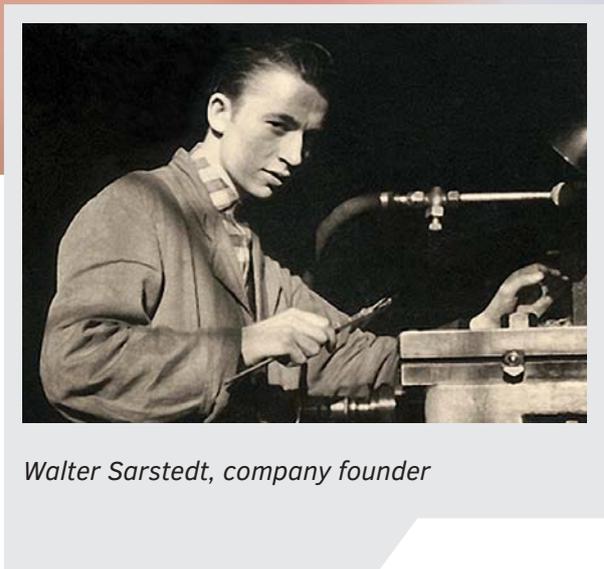

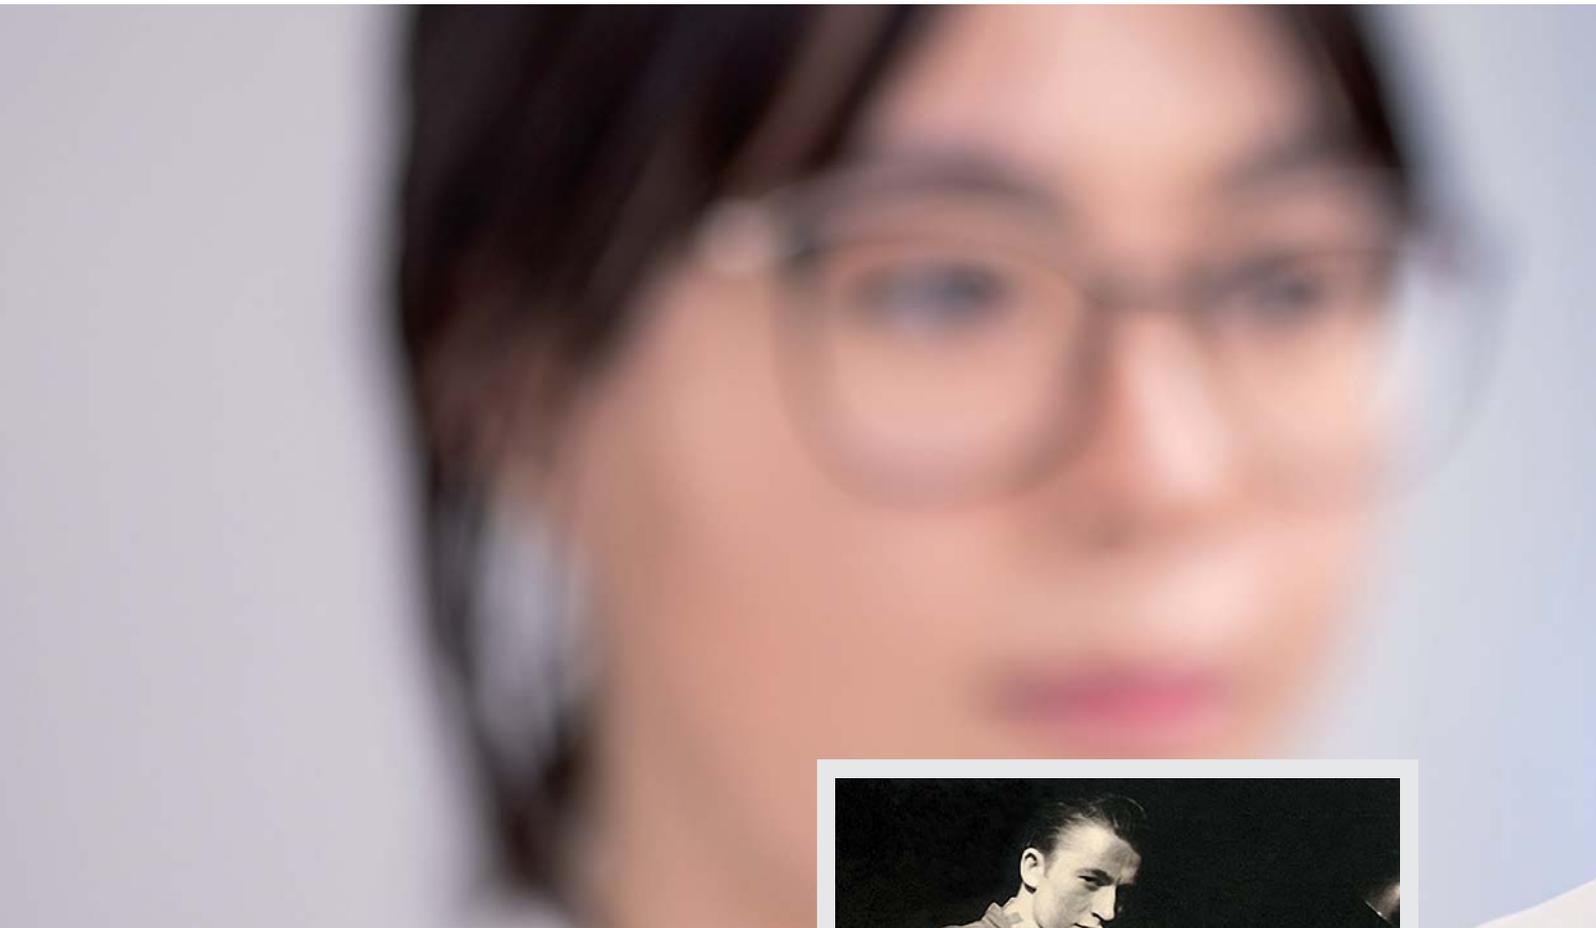

To make your workflow excellent.

“**SARSTEDT**, a family-run company, has been a leader in laboratory and medical technology for over six decades. With a global team of more than 3,000 employees, we pursue a common goal: to support laboratory and medical professionals worldwide.

Through close communication with our users, we gain a deep understanding of their daily challenges and needs. Based on this, we develop intelligent solutions that optimise their demanding workflows and stand out thanks to their added value in application and performance throughout the entire workflow.”

From a one-man operation to an international corporation

The SARSTEDT journey

Walter Sarstedt, company founder

Walter Sarstedt laid the foundation for the company **in 1961**. He started production as a one-man operation in a small hall in Rommelsdorf, a district of Nümbrecht, Germany. From pioneering the development of the first plastic tablet tube to strategic acquisitions, every milestone has strengthened SARSTEDT's position.

Today we are proud to be a leading global group of companies developing, producing, and distributing laboratory and medical technology solutions. The second generation of the Sarstedt family continues to play a key role in the company's supervisory board, thus preserving the entrepreneurial legacy of Walter Sarstedt. At the same time, the third generation is also involved in the operational development of the company and is bringing new ideas to the table. Values such as partnership and the highest quality standards continue to shape our actions, as does our ongoing commitment to our employees, customers, and suppliers.

Your partner in medicine and science worldwide

North America

Our production facility in North America enables us to optimally serve customers in the US and Canada with customised products and reliable delivery times.

Founded

Australia

Our production facility in Australia enables us to serve the Asia-Pacific market with customised solutions and fast delivery.

“With our quality standards, we are constantly improving what is already known and developing innovative solutions. In this way, we create real added value in application and performance throughout the entire workflow.

We act with confidence and passion and, above all, with openness to the needs of users in healthcare and research. Their practical requirements give us the decisive impulse for tailor-made innovations.

The sustainable success of our customers is the basis for our growth. To this end, we focus on long-term partnerships in all markets that are based on trust, mutual appreciation, and shared convictions.”

Our business areas

We offer an exceptionally broad product portfolio in the areas of pre-analytics, life science, laboratory automation, and sample transport.

Pre-analytics

For clinics, medical practices, and laboratories, we offer a comprehensive range of sampling systems and accessories for blood, urine, stool, and saliva. We place the highest value on safety and efficiency.

Life Science

In the fields of liquid handling, cell culture, molecular biology, sample processing, and microbiology, we offer customised solutions of the highest purity and consistent quality. They have been specially developed to ensure reproducibility in analysis. Our products are certified and meet the most stringent research requirements.

lifescience.sarstedt.com/en/

Laboratory automation

Our automation solutions make laboratory processes in pre-analytics faster, more accurate, and more economical. Our many years of experience as a partner in laboratory automation make us a reliable partner for your requirements.

automation.sarstedt.com/en/

Sample transport

As an essential part of the pre-analytical workflow, our sample transport products ensure the safety and integrity of your diagnostic samples. We know how important it is to ship potentially infectious samples safely and in accordance with country-specific standards and regulations in order to protect everyone involved and achieve optimal analysis results.

“The constant optimisation of products, processes, and services for practical use is a key factor for our future viability. In our search for the best solution, we take the user's perspective, question the tried and tested, and constantly strive to learn new things. This drive is reflected in the wide range of our innovative products, such as our systems for blood collection, life sciences, and laboratory automation.”

Everything from a single source

Our services cover the entire process from development and production to sales. With our absolute commitment to quality, we ensure that our customers' requirements are met precisely and efficiently.

Research and development

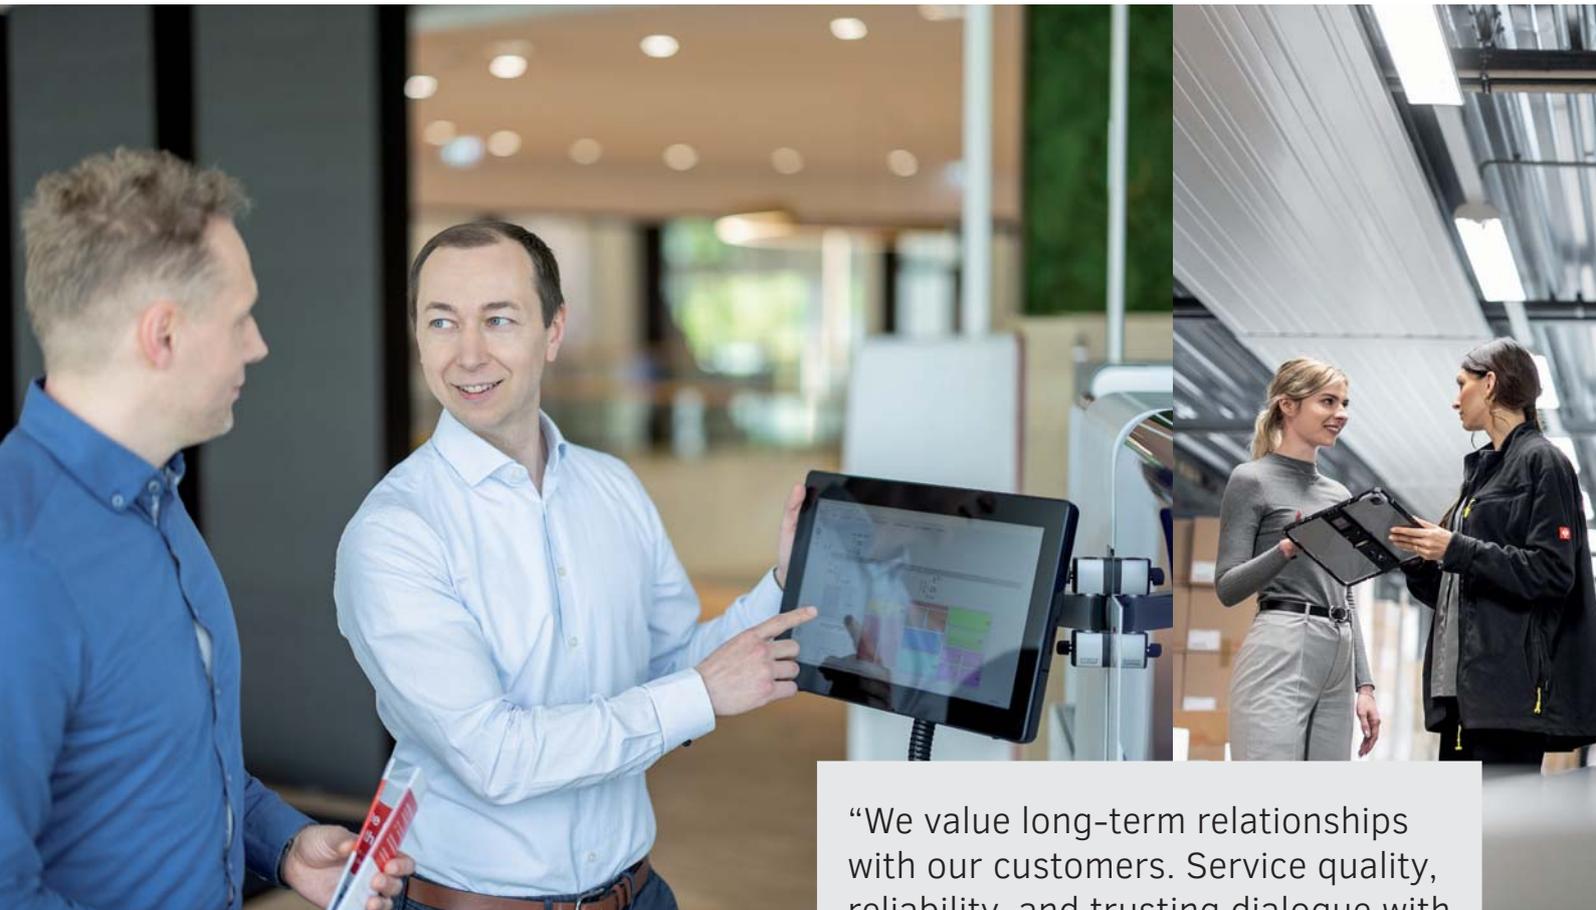

We develop intelligent solutions for your specific needs to optimise your workflow.

Since our company was founded, we have placed great emphasis on research and development. In order to identify future trends and understand the needs of our customers, we are in constant communication with users in the fields of medicine and science. Based on these findings, we actively drive innovation in our own research and development center and take ideas from conception to market readiness.

Production

We are committed to uncompromising quality for your optimal workflow.

We manufacture more than 90% of our products in our own facilities in Germany and worldwide. We rely on state-of-the-art technologies, standardised processes, and continuous quality monitoring and analysis, always in accordance with the respective national and international regulations. In addition, we attach great importance to ongoing investment in the continuous training of our employees.

Service and sales

We are your reliable and supportive partner, ensuring your workflow runs smoothly.

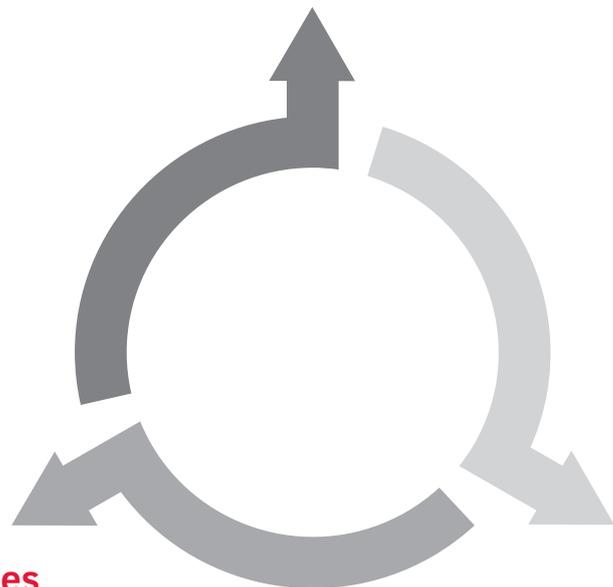

Our global service team serves as a direct interface between SARSTEDT and our customers, offering comprehensive expertise and support in the selection and use of our products. With sales organisations and field staff in around 30 countries, SARSTEDT ensures comprehensive availability. In numerous other countries, experienced distributors take care of the needs of the market.

“We value long-term relationships with our customers. Service quality, reliability, and trusting dialogue with our partners in medicine and science are the key factors for our success. That is why we consistently focus on the needs of our customers and offer a range of services that is precisely tailored to the requirements of medical practice.”

Quality from a single source: We offer you comprehensive services from a single source – from the initial idea to delivery.

Service and sales

“We are committed to protecting the environment and the health and safety of our employees. This is based on the use of state-of-the-art technologies, the efficient use of resources, and continuous improvement in occupational safety. Our efforts are focused on harmonising economic and ecological considerations.”

Responsibility leads to sustainability.

As an independent family business, we feel committed to the environment and future generations. In line with this responsibility, we continuously optimise our processes, promote social growth, minimise our ecological footprint, and protect people's health in a sustainable manner.

Sustainability in action

With over 60 years of experience as a family-run company, we have developed a deep understanding of long-term thinking along the entire value chain. Our approach to sustainability is based on the 17 United Nations Sustainable Development Goals, with a particular focus on health, education, climate protection, and sustainable production. Since 2023, we have been transparently aligning our company with the standards of the UN Global Compact and ensuring that our strategy is consistent with globally accepted principles.

Our commitment is reflected in efficient processes, minimal resource consumption, and innovative, resource-saving solutions. We value meaningful recycling in order to further promote the responsible use of natural resources.

Sustainability performance made visible

In 2025, SARSTEDT was awarded the silver medal by EcoVadis, one of the world's recognised platforms for assessing corporate sustainability. The rating makes our commitment to the environment, labour and human rights, ethics, and sustainable procurement transparent and shows that we take our responsibility seriously throughout the entire value chain. The assessment provides an independent classification of our actions and underlines our commitment to working sustainably, transparently, and according to clear standards. (As of 05/2025)
